PRODUCT DESCRIPTION:

High urea form of nitrogen that is effective as a foliar feed for growing foliage plants. Formulated according to University recommendations for foliage crops suggesting a 3-1-2 ratio fertilizer. Urea is used as the principle source of nitrogen since research has indicated that the majority of foliage crops can readily utilize it. Contains enhanced magnesium and sulfur levels to promote dark green foliage.

SUGGESTED DIRECTION FOR PROFESSIONAL USE:

FOLIAR FEEDINGS: Use up to 6 ounces of fertilizer in 100 gallons of water and spray to a run-off, in houses or outside when temperatures are cool.

TANK MIX: Use 1 to 2 pounds in 100 gallons of water. Apply when temperatures are cool, drenching pots or beds at the rate of 1 quart per square foot of space, rinse foliage with clear water.

CONSTANT FEEDING WITH EVERY WATERING: Normal water rate is half gallon per square foot of space.

ACTUAL CONCENTRATION USED SHOULD BE DETERMINED BY SOIL TESTING AND PLANT GROWTH

INTERMITTENT FEEDING: 7 TO 10 DAY SCHEDULE

To obtain 400 ppm of nitrogen, use the following settings and concentrations:

Injector Ratio	PER GALLON OF CONCENTRATE
1:200	2 pounds 12 oz
1:100	1 pound 6 oz
1:50	11 oz

Warranty: Warranty of this product implied, is limited to the guaranteed analysis on this label, in as much as misuse is beyond sellers control. Likewise, seller is not liable for any injury to living things, crops, soils, or materials which may result from the use of this product.
